

Qkiosk

Floor plan kiosk for rooms and desks

Introducing the real-time floor plan kiosk, displaying a graphical view of room and/or desk status for ResourceXpress

Displays real-time floor maps showing the status of any bookable workspace

Requires any Windows 7 or 8 based touchscreen PC, iPad or Android touchscreens

Floor plan maps can have additional hot spots for links to other information such as emergency escape routes and fire extinguisher locations

Optional interactive access for instant booking, check-in, check-out and extend functions

Powerful search feature to locate rooms by name, bookings by title, bookings by organiser and desks by ID

Supports standard ResourceXpress authentication model using PIN codes, user name and password or external RFID reader

Qkiosk

Display one or more real-time floor maps showing room and desk status with optional interactive access for instant booking, check-in, check-out and extend functions

Delivering a professional workplace image plus significant improvements in room and resource efficiency

Summary

The QKiosk floor plan kiosk for rooms and desks is a standard module provided by the ResourceXpress server that displays one or more real-time floor maps showing room and desk status with optional interactive access for instant booking, check-in, check-out and extend functions. Multiple floor plan maps can be linked together to deliver multi-site, multi-building, multi-floor or multi-zone access which provides global visibility and system-wide access to bookable rooms and desks.

Requirements

- ResourceXpress server with one or more room configured room or desk resource profiles
- Any Windows 7 or 8 based touchscreen PC e.g. All-In-One Touchscreen PC or dedicated touch screen kiosk
- Suitably sized jpeg images for floor plans

Details

- Each room or desk icon displays the current status i.e. red is busy and green is free
- Next or current room booking details shown on icon as scrolling text
- Icons can be enabled for interactive access to full resource booking screens (e.g. room screen)
- Easy to use and quick to maintain floor plan builder requires a jpeg image for each floor plan zone
- Floor plans can be linked sequentially or via hot spots on multi-level navigation plans
- Powerful search feature to locate rooms by name, bookings by title, bookings by organiser and desks by ID
- Floor plan maps can have additional hot spots for links to other information such as health and safety information, emergency escape routes and fire extinguisher location
- Supports standard ResourceXpress authentication model using PIN codes, user name and passwords or external RFID reader
