Real-time meeting schedule display complete with visitor way-finding information

Customisable image banner for advertising or corporate branding and message ticker

Multi hardware options including any Windows based PC, with a TV display, dedicated kiosk or IOS tablet

The QSign meeting schedule displays a real-time list of live events for the configured zones

## Delivering a professional workplace image plus significant improvements in room and resource efficiency

### Features

The QSign meeting schedule display is a standard module provided with the ResourceXpress server that displays a real-time list of live events for the configured zones. It can be displayed on any Windows or Android screen hardware from small wall-mounted screens covering single floors or zones to large format TV's in reception areas covering the complete building. Any number of QSigns can be configured for the licenced rooms providing a complete way-finding system for visitors and employees throughout the building.

### Requirements

- ResourceXpress server with one or more room resource profiles
- Any Windows based PC base unit or Android device with attached large PC or TV screen. NB: also works with IOS/Android tablets for smaller zones

### Details

- Multiple screen profiles can be configured for one or more rooms with auto-paging of content where necessary
- Works with multiple languages
- Information displayed includes event title, start and end times, organiser, location and directional/location information
- Links to ResourceXpress messaging for company news, health and safety, security and alarm testing messages
- Header banner fully customisable for corporate branding
- Can be configured to sequence screen to other web page content e.g. travel, news or other digital content
- Can be used independently or in conjunction with room screens and/or QKiosk floor plan kiosks
