

RX Mobile from ResourceXpress

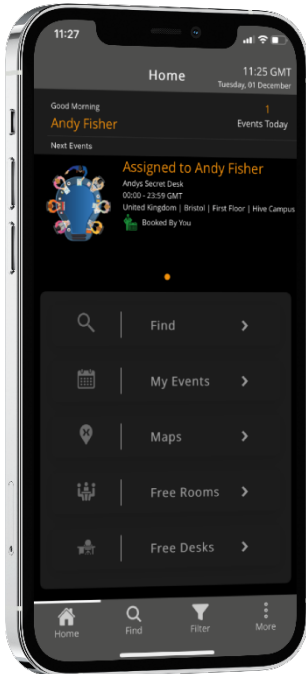

Figure 1 - RX Mobile Dark Mode

RX Mobile is the fantastic new addition to the ResourceXpress suite. Available from the Apple App Store for iOS or Google Play Store for Android. RX Mobile is the essential tool for quickly searching and booking meeting rooms, desks and workspaces on the fly. -

Building on the popular ResourceXpress mobile web app, we've completely re-designed and re-engineered the app for the modern agile workplace. Importantly, RX Mobile incorporates all the latest ResourceXpress features aimed at combatting Covid-19 and assisting a safe return to work for office workers.

RX Mobile at a glance benefits:

Distance friendly alternative to point of use operations - Contactless search and book for resources using your own device, minimizing contact with office-based touch control devices and reducing cross infection risks.

Find Resources – Powerful filtering and search facility. Use the pre-defined filters to focus the app on your location, or frequently used resources. View capacity and resources available in rooms and on desks. Book, check-in/out, extend bookings wherever you are.

My Events – Quickly view your daily bookings, view resource locations and get directions using office floor maps.

Maps – View office floor images and immediately see what resources are free or booked.

Free Rooms – Quickly see what meeting rooms are free for your pre-defined locations.

Free Desks - Quickly see what desks are free for your pre-defined locations.

Equipment – See what equipment is available with your desired room or desk and report any faulty items.

Themes – Choose dark or light modes to suit your preference.

Other standard ResourceXpress features aimed at combatting Covid-19 and assisting a safe return to work:

- Increasing space between working desks by auto ringfencing bookings and blocking-out of adjacent desks.
- Traceability - Providing the ability to trace booking attendance in the event of a post reservation infection, to protect the entire workforce and their families.
- Ability to limit resource booking capacity in buildings/floors/zones to reduce risk of overcrowding.

- Touchless meeting room screen and desk booking device control.
- Last occupied or Last cleaned message is shown in Qubi, Kiosk and Maps.
- Setup & clear-down times can now be added to resources by space type.
- Specific facilities work schedule reports are now available to support set up and clear-down activities.
- Coming soon! – Integration of Cliq (QR Code booking) into RX Mobile.

Note: SaaS customers with remote users will be subject to a remote access charge to cover the anticipated number of users. Existing customers can roll out RX Mobile (or the existing Web App) for up to 250 users free of charge until the end of their existing subscription anniversary. Please call sales@gedas.com (EU and ROW) or ussales@gedas.com (North America) for more details.
