

WORKSPACE LICENCES

Designed for the modern, agile workplace
Use for desks, meeting rooms or huddlespaces

resource
Xpress

Used for any type of spaces, ResourceXpress workspace licenses are designed to satisfy the needs of the modern, agile workplace.

Effective management of hot desks and office hoteling areas is vital to ensure corporations operate at peak efficiency and reduce real estate costs.

Reducing the number of fixed desks can have a major impact on profitability but for service users the flexibility can lead to an improved work/life balance and better job satisfaction.

The Covid-19 pandemic has reinforced the need for clear workspace status indication and better space management to reduce cross infection risks and promote social distancing.

ResourceXpress workspace licensing is designed to meet these demands in the most cost-effective way to bring large numbers of varied resources under centralized management. Can be used as a software only solution for any workspace or with Qubi3's installed on desks for point of use booking/check-in/out and clear status indication with configurable LED's.

ResourceXpress workspace software is available as a one-off perpetual or annual subscription license. The server can be installed on-premise or virtual cloud. Also available as a SaaS annual subscription with multi-tenant or dedicated servers. Extremely scalable from a single office up to multiple offices in different countries with geo resilience and load balanced, managed services.

Features

- Complete real time visibility of workspace reservation status - no more arguments about bookings and disruption!
- Interactive searching and instant booking for ad-hoc reservations, ResourceXpress provides real-time access via mobile devices, fixed kiosk, desktop browser or by using Qubi3 point of use booking devices
- My Events feature on the ResourceXpress kiosk interface quickly shows current bookings on a kiosk, mobile device or a PC desktop browser
- Free Desks/Rooms feature on the ResourceXpress kiosk interface quickly locates free resources by city, building, floor, workgroup zone or by available facilities on a kiosk, mobile device or PC desktop browser
- Automatically ring fence nominated adjacent workspaces when making a booking to ensure social distancing policies are adhered to
- Touchless booking/check-in/out with Qubi3 devices to minimize cross infection risks
- Licensed by number of workspaces. Unlimited number of kiosks or mobile web app users
- Solves the no-show issue for workspace bookings using web app or e-mail check-in or by using Qubi3's to confirm the reservation and retains the booking
- Comprehensive, predefined chart reporting for actual resource utilization and reservation no-shows. Track and trace users bookings over a period, in the unfortunate event of a reported infection incident
- Find feature on the ResourceXpress kiosk interface lets your quickly search and book workspaces by city, building, floor, zone or by available facilities on a kiosk, mobile device or a PC desktop browser
- Maps feature on the ResourceXpress kiosk interface displays a user-friendly floor map of all resources allowing viewers to quickly identify free resources by floor or zone on a kiosk, mobile device or PC desktop browser
- Provide additional automatic clean down bookings, in line with customer defined policies to reduce risks of cross infection
- QR Code booking/check-in/out with user owned devices to minimize cross infection risks
- Low cost non-bookable, permanently assigned workspaces can be searched and viewed on kiosk or maps
- Temporary assigned workspaces can be freed up to the bookable pool with reverse hoteling
