

Qkiosk

Easily Find & Book Rooms & Desks!

Introducing the simplest way to find & book meeting rooms, workspaces and other resources. Search for colleagues or rooms with specific resources and easily browse your reservations with Q-Kiosk for ResourceXpress

Powerful search feature to locate rooms by name, bookings by title, bookings by organizer and desks by ID

Works with any touchscreen PC, iPad or Android tablet with a modern browser

Floor plan maps can have additional hot spots for links to other information such as emergency escape routes and fire extinguisher locations

Interactive access for instant booking, check-in, check-out and extend functions

Displays real-time floor maps showing the status of any bookable workspace

Supports standard ResourceXpress authentication model using PIN codes, user name and password or internal (Multi standard) RFID reader

Qkiosk

Display one or more real-time floor maps showing room and desk status with optional interactive access for instant booking, check-in, check-out and extend functions

Delivering a professional workplace image plus significant improvements in room and resource efficiency

Summary

QKiosk is a standard module provided by the ResourceXpress server. It can be displayed on our own kiosk hardware (as shown), or any suitable touch screen PC or tablet. Reserve meeting rooms, desks and other workspaces using the free rooms/desks feature or view your personal reservations via a secure login. Office floor maps can also be displayed, giving users instant booking, check-in, check-out and extend functions

Requirements

- ResourceXpress server with one or more room or desk resource profiles set up
- Works with dedicated kiosk hardware (as shown above), via a mobile device or any suitable touch screen PC or tablet with a modern browser
