

November Newsletter

Q4, 2025

From the desk of Andy Fisher, Business Development Director

Hello and welcome to this edition of our quarterly newsletter.

It has been a hugely productive few months! Firstly, massive congratulations to our DevOps team, who have successfully completed several significant projects that directly address the functional requirements of our diverse client base. We're exceptionally excited about the release of our new Microsoft Teams application, RX Work Places.

This year, many clients reviewed their hybrid working strategies and are now moving into the implementation phase for 2026. The RX Work Places Teams app supports these evolving needs, enhances employee collaboration, and delivers a superior employee experience. We're eager to see how this innovation will empower our technology and reseller partners worldwide as they continue to respond to changing client demands.

Our team also had an amazing experience exhibiting at WORKTECH London 2025, where we engaged with organisations discussing their needs in the ever-evolving workplace landscape and demonstrated how our solutions are helping to address those challenges.

We're proud of what we've accomplished this past quarter and look forward to an even more successful one ahead!

It Starts with You

At **ResourceXpress (RX)**, your input is shared with our development team, who transform insights from around the world into safer, smarter, and more collaborative workspace solutions.

This year's results:

RX Work Places

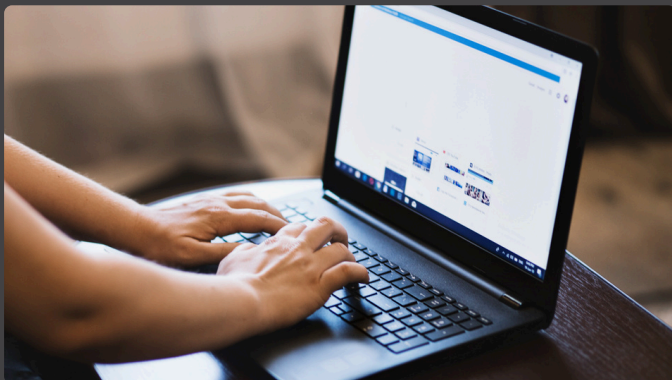

A Microsoft Teams solution that helps plan and coordinate hybrid work while giving you real-time visibility into who's working where. It also automatically handles PTO, travel and annual leave to free up space and time.

Have We Met?

This year, we had the chance to meet many of you face-to-face. Exhibiting at key industry events allowed us to exchange ideas, learn from partners, and share the latest innovations in hybrid work.

“We had exciting conversations at **WORKTECH London** about our new Teams app, RX Work Places, which offers clients major convenience and a great user experience.”

[Read More](#)

“At **WORKTECH Chicago**, We celebrated the launch of RX’s integration with the Crestron DeskQ, strengthened our relationships with existing clients, and opened the door to new conversations with potential partners.”

[Read More](#)

“Engaging with industry peers and technology partners at **Unified Communications Expo (UCX) Events** helped us understand how to move our ideas forward!”

“Connecting with established workplace professionals during **Institute of Workplace and Facilities Management (IWFM) Events** kept us aware of developing workplace management challenges.”

Employee Spotlight

This quarter, we're shining a light on **Ella!**

Ella started as an apprentice 10 years ago and has grown into a trusted leader on our tech support team, whose skill keeps clients' operations running smoothly.

Ella, Support Team Leader

Why did you pursue a role in tech support?

"I really enjoy the problem solving aspect and overcoming new challenges."

What's your favourite way to spend a day off?

"Working on cars, especially if it makes them faster!"

If you could travel anywhere in the world, where would you go?

"I'd love to visit Tokyo in Japan."

It Continues with You

Thank you for being part of the ResourceXpress journey this year. Your collaboration and feedback push us forward, and we cannot wait to celebrate even more milestones in 2026!

Finish the year strong with RX supporting your hybrid workplace:
