

May Newsletter

Q2, 2026

From the desk of Ian Fisher, Technical Director

Hello and welcome to our second quarterly newsletter of 2026. The ResourceXpress (RX) team has had an outstanding quarter!

Over the past few months, we've focused our efforts on delivering new functionality that directly addresses our clients' needs. Listening to client requirements and building solutions that meet them is one of our core strengths.

I want to commend our exceptionally talented development team for completing the following key projects this quarter:

RX Work Places Version 2

Our native MS Teams application has been upgraded, providing clients with full RX functionality directly within the Teams environment.

V2026.1 Release

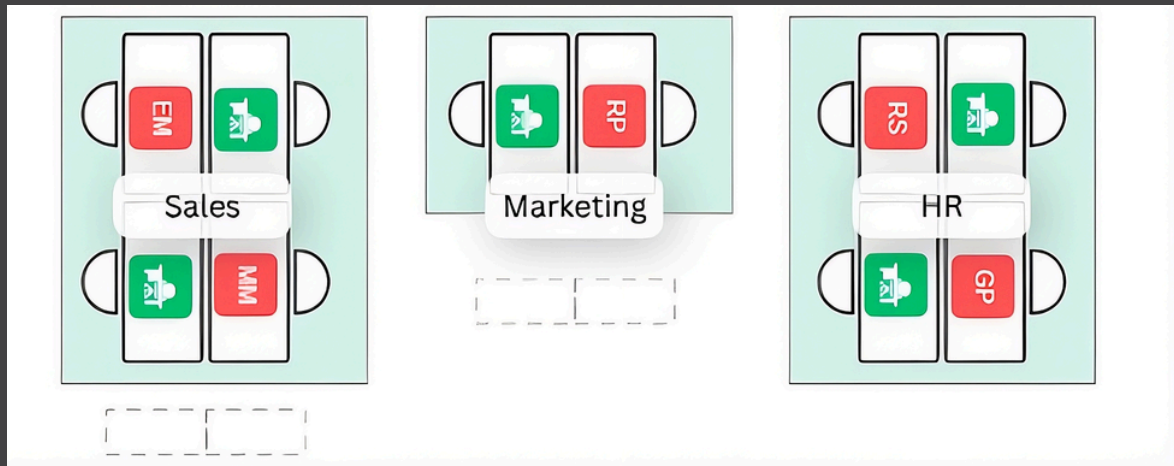

The RX admin module has received significant enhancements, improving usability and making it far more user-centric.

Crestron Integration

We have completed support for the Crestron 70 and 80 series room panels, enabling seamless integration with our platform.

Looking ahead to the next quarter, we are excited to release a host of features which will include:

Dynamic zoning of workspaces.

Customizable report booking templates to give clients even more flexibility in managing their environments.

The team have also been out engaging with the wider industry.

Last month, we exhibited at The Workplace Event, connecting directly with consultants, partners, end users, and organizations seeking smarter workspace management solutions.

In June, we'll be at Infocomm in Las Vegas, where the team will be presenting in two locations:

Our Crestron room panel integration will be featured on a dedicated panel at the Crestron stand.

We will also showcase our advanced API integration with Qbic's desk device and room panel on a dedicated section of their stand.

Please stop by to say hello and see the latest developments in action. The team would love to meet you!

It Starts with You

ResourceXpress (RX) doesn't just adapt to workspace management trends — we reshape them.

What's Landed This Quarter:

RX Work Places V2

Hybrid working has changed how people use the office.

And companies demand an easier experience.

RX Work Places V2 gives teams a clearer view of who is in the office, where people are sitting and how spaces are being used.

It helps everyone stay connected and makes the workplace easier to navigate.

Stop chasing browsers and stay in one native application.

RX Mobile Notify App

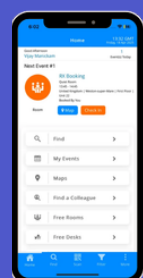

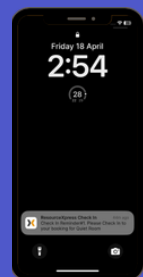

Your Office in Your Back Pocket!

The workday can shift instantly, and hybrid working moves fast. RX Mobile Notify is built for that pace, putting essential workplace tools right in your pocket so teams can stay ahead.

Booking reminders, cancellation alerts, colleague visibility and quick booking adjustments help everyone stay organised and in control throughout the day.

RX Work Places has now joined RX Mobile Notify, bringing interactive maps, workplace navigation and space-management tools into one powerful mobile experience.

Everything needed to navigate the workday, all in one place.

It Starts with You

ResourceXpress (RX) doesn't just adapt to workspace management trends — we reshape them.

What's Landed This Quarter:

RX & Crestron Integration

The Crestron TSS-70 and TSS-80 room panels now integrate directly with our platform, delivering intelligent workspace management and premium room scheduling in one seamless experience.

This integration provides real-time room availability, effortless booking workflows, improved space utilization, streamlined deployment, and a consistent user experience.

This new capability will debut at InfoComm 2026, where ResourceXpress will feature on a dedicated panel at the Crestron stand, giving attendees an exclusive first look at the experience.

Looking Ahead

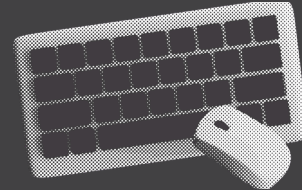

We are listening on how to constantly advance your workplace from space optimisation to streamlining admin tasks.

Booking Policies

A dynamic zoning and granular booking policy setup lets organisations control exactly who can book what and when.

For example, with 100 desks and a 200-person team, Team A books desks Monday–Wednesday while Team B works from home, then on Thursday–Friday Team B uses the office while Team A works remotely

Version 2026.1

A user-centric setup experience makes configuration noticeably easier, cutting out unnecessary steps and giving administrators a cleaner, more intuitive way to get everything up and running.

Self-Configuration Maps

Self-configuration Maps let teams efficiently build and update their own workspace maps, keeping layouts accurate and up to date.

Booking Report Template

Customisable booking reports let users build their own report templates, save them, schedule them, and receive the exact insights they need whenever they want them.

Let's Meet!

“Our debut at **The Workplace Event, Birmingham** exceeded all expectations. It was amazing to reconnect with partners and to welcome prospective clients, especially during our RX drinks evening!”

[Read More](#)

“In June 2026, we are jetting off to Las Vegas for **InfoComm!** In collaboration with our trusted partners, *Crestron* and *Qbic*, we’re anticipating three days of significant conversations about what’s next for enhancing workplace management solutions.”

Employee Spotlight

This quarter, we're shining a light on **Robert!**

Robert has been with ResourceXpress for 4 years and consistently ensures customers get fast, reliable support. He tackles complex technical issues with clarity and keeps our service running smoothly.

Why did you pursue a role in tech support?

"I chose tech support because it lets me keep learning while helping people. I like working across hardware and software, troubleshooting issues, and turning complex problems into simple solutions. The role is rewarding because I'm part of a team that keeps things running smoothly and supports people daily."

Do you prefer dark mode or light mode?

"I prefer dark mode because it feels easier on the eyes."

Which do you find more relaxing: a morning walk or an evening walk?

"I find early morning walks more relaxing. The air feels fresher, the surroundings are quieter, and there's a calm atmosphere before the day gets busy."

It Continues with You

We're focused on delivering business goals from day one with enhanced software built by people, for people.

Thank you for choosing us.
